

CloudFusion

Helping modern business soar with cloud

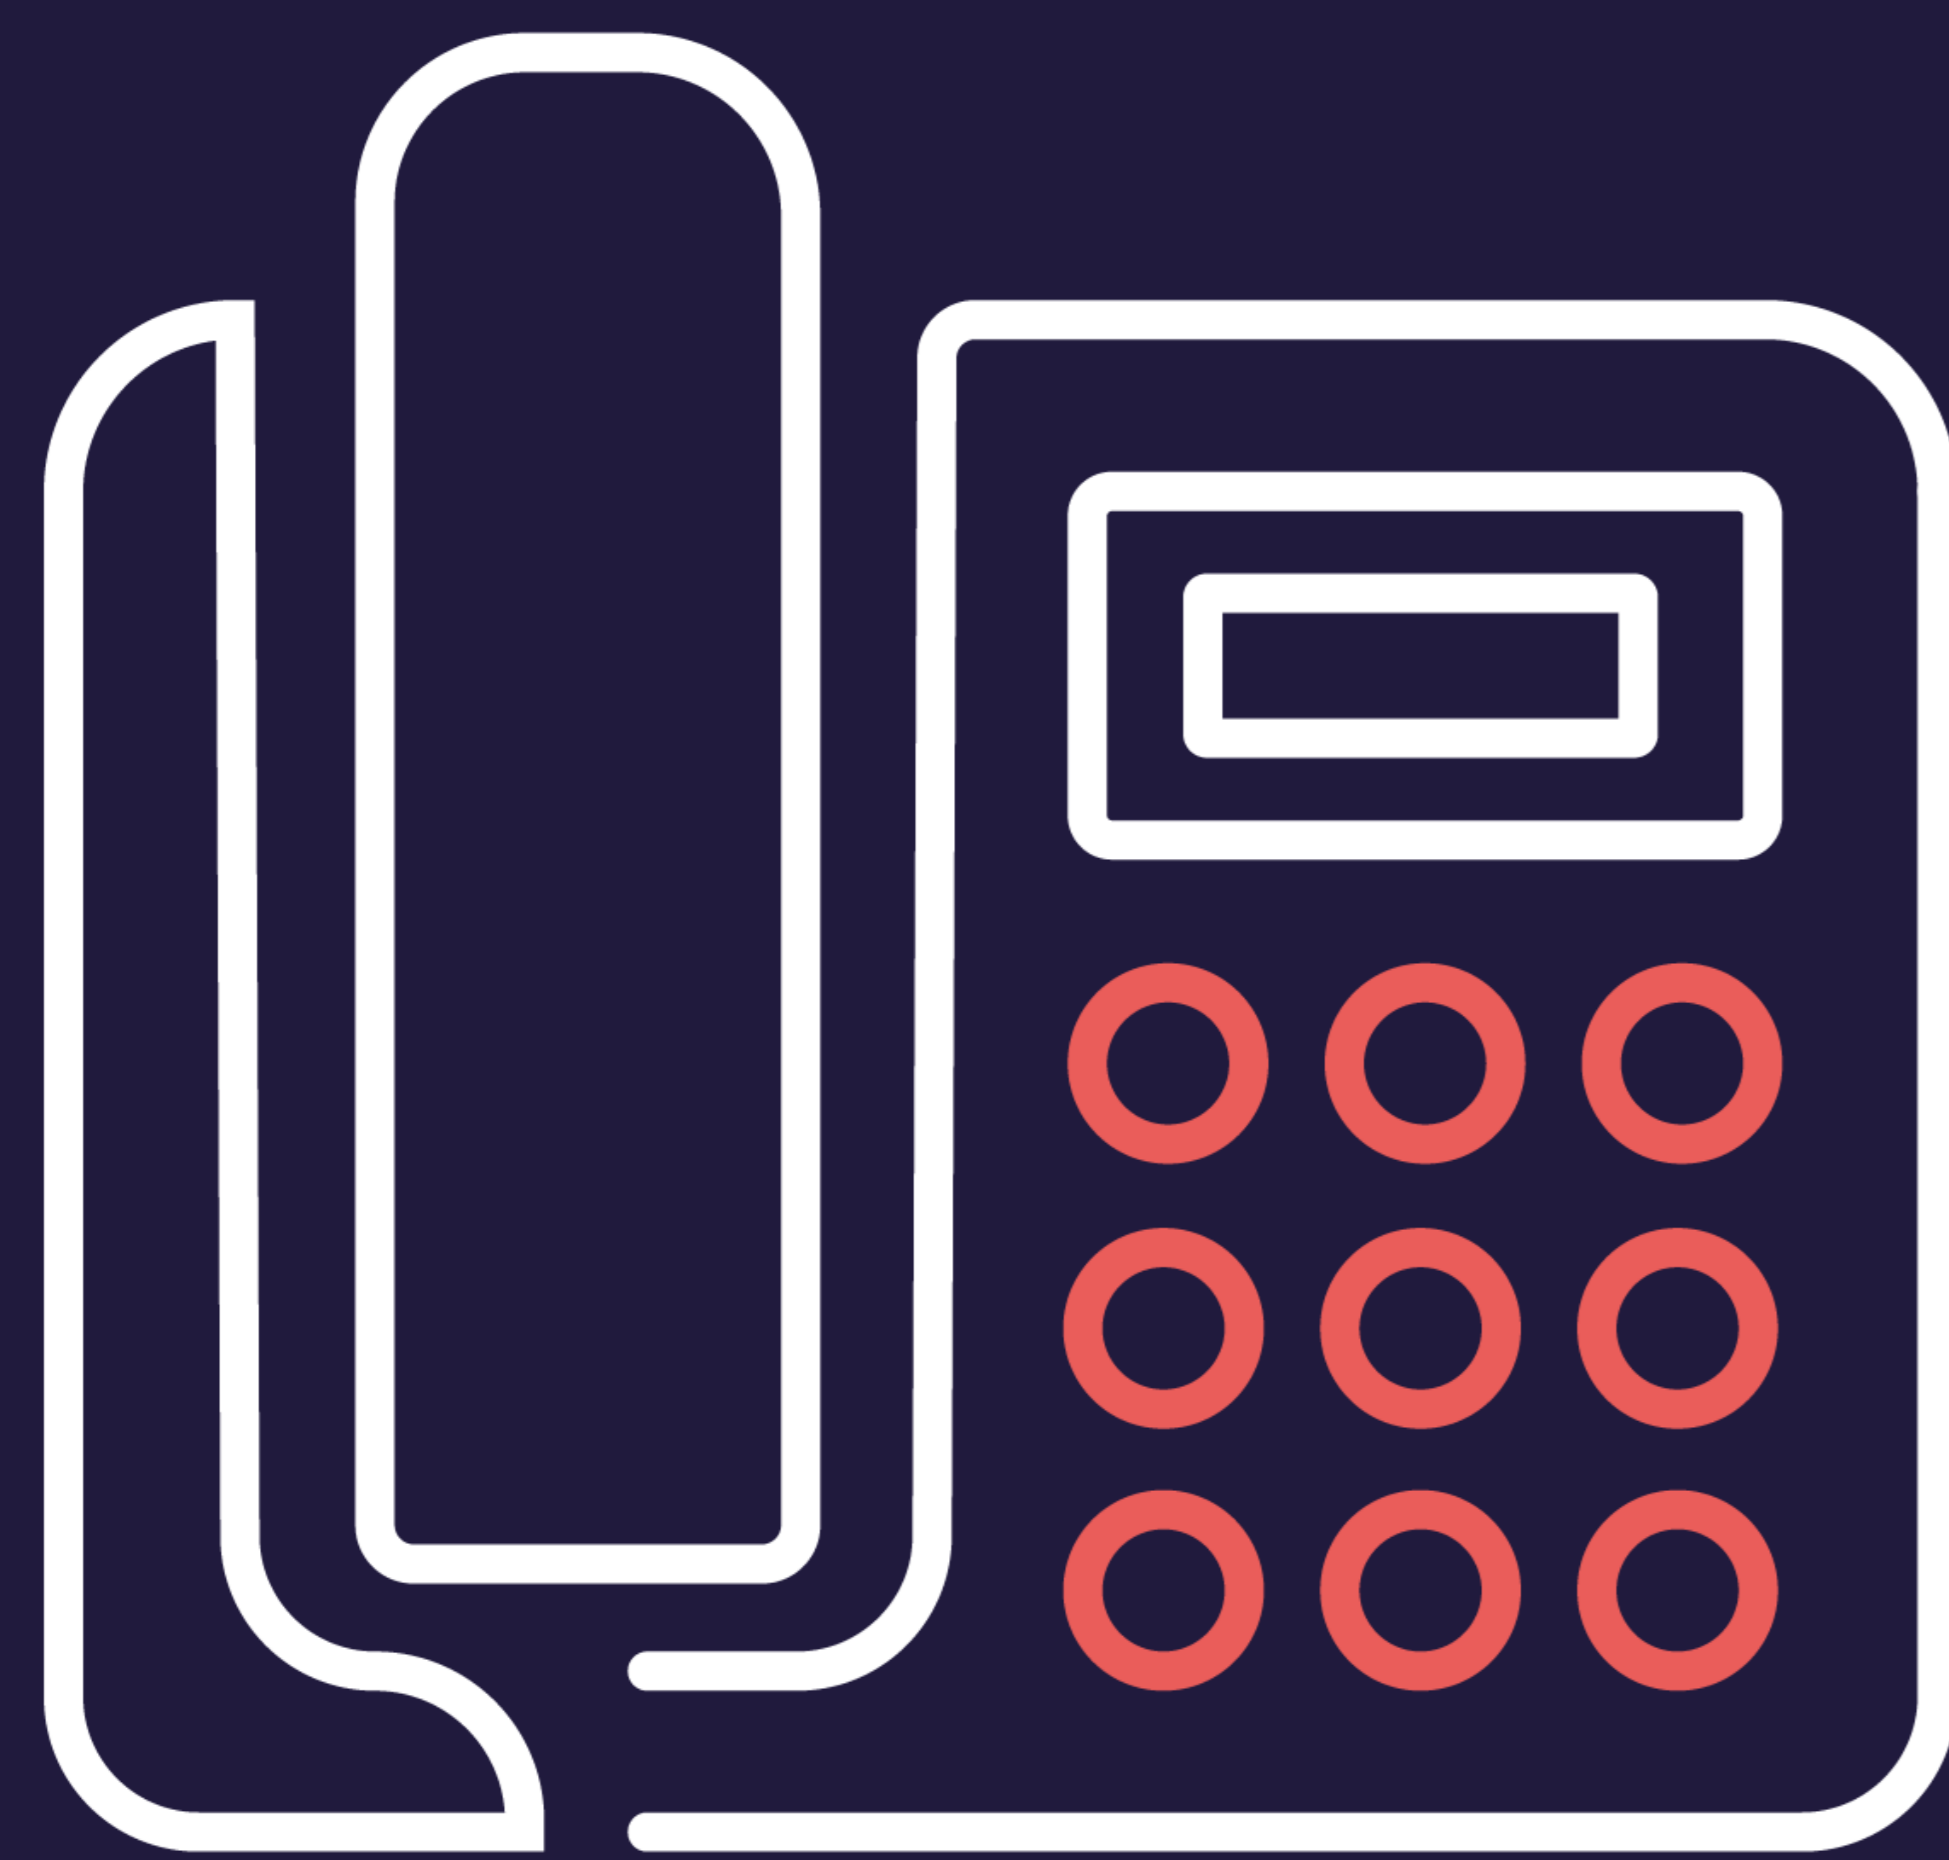

Smart business tech solutions, tailored to you

Discover a uniquely integrated suite of essential business services, made for your team, backed by expert support.

Telecoms

Reliable voice solutions built for business.

Why choose our cloud telecoms?

Hosted VoIP systems

Clear, professional calls over the internet, no expensive hardware needed.

Advanced call routing

Direct calls where they need to go, fast. Perfect for sales, support, or hybrid teams.

Seamless integrations

Connect easily with your CRM, helpdesk, or collaboration tools.

Work anywhere

Stay connected in the office, at home, or on the move, without a drop in quality or service.

Scalable to fit your business

Add or remove users as your team grows and only pay for what you need.

Cost-effective plans

Packages start from just £9.99 +VAT/month (no large upfront investment).

Reliable & secure

Built-in redundancy and security protocols keep your communications safe and online.

Easy setup & maintenance

Hassle-free setup paired with ongoing support and automatic updates.

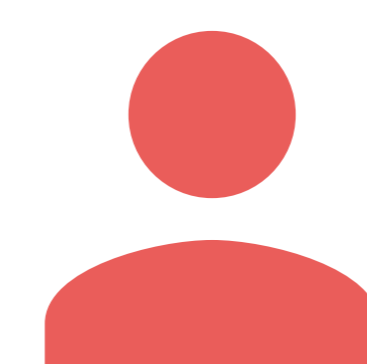

24/7 expert support

Our team is here around the clock to keep things running smoothly.

Our cloud telephony features:

Voicemail-to-email

Virtual receptionists

Real-time
call analytics

Video conferencing

Collaboration tools

Connectivity

Fast, reliable internet and private networks.

Keep your team connected with high-speed internet solutions, enjoy lightning-fast downloads, seamless video calls, and smooth online collaboration.

Leased lines for dedicated performance

- Private, uncontended internet connection just for your business
- Symmetrical upload/download speeds
- Rock-solid reliability and ultra-low latency
- Ideal for heavy-duty operations and heavy bandwidth use

FTTP Broadband

- Full-fibre connectivity direct to your building
- Super-fast speeds and maximum uptime
- Perfect for growing, cloud-first businesses

SoGEA Broadband

- High-speed internet without a landline
- VoIP-ready and future-proof
- Quick to install and simple to manage

Business mobiles

Stay connected with flexible mobile plans.

Tailored business tariffs, device sourcing, mobile device management (MDM), and multi-network options

SIM-only business plans

Cost-effective, contract-free mobile solutions built for flexibility, scalability, and control. Ideal for teams who already have devices, with prices from £9.99 +VAT/month.

Business mobile devices

A range of modern smartphones and tablets, curated for durability, performance, and seamless business use. Choose hardware that matches your workflow.

Mobile Device Management (MDM)

Remotely manage, monitor, and secure your company's mobile fleet, enforcing security policies, wiping lost devices, and pushing updates with ease, whilst having control of data access and app permissions.

Multi-network options

Choose from leading UK networks for best coverage. Match your location or use-case with the right provider, getting strong signal and data performance, wherever you are.

Why choose our business mobile solutions?

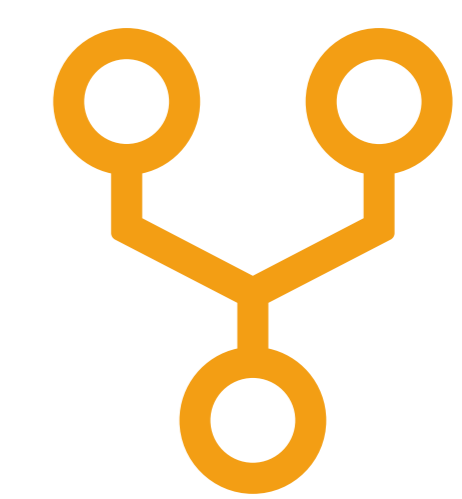

Boost productivity

Advanced device security

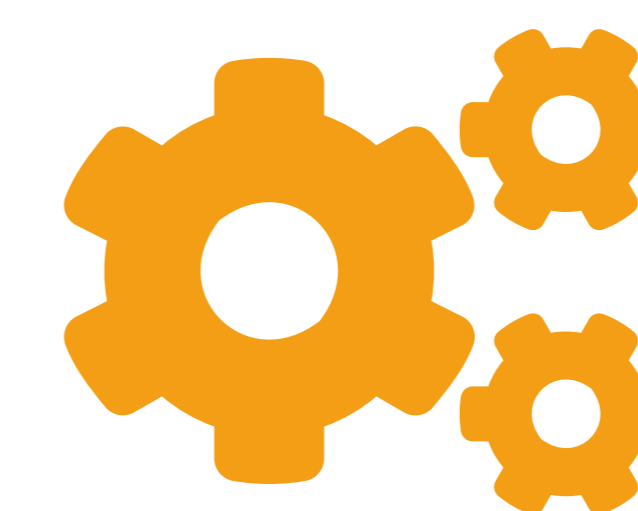

Flexible plans

Optimised network performance

Tailored to you

Control charges and fees

Mobile fleet visibility

CloudFusion

Business energy

Smart, sustainable energy procurement.

We help you find the best utility deals with fixed or flexible contracts.

Fixed or flexible energy contracts

Choose the right energy plan to suit your budget and risk appetite. Lock in prices or stay flexible depending on market trends.

Multi-site energy management

Simplified procurement across multiple business locations, with centralised contract handling for ease and consistency.

Full-service support

From quote to contract renewal, we manage the process end-to-end, so you focus on your business whilst we handle the energy side.

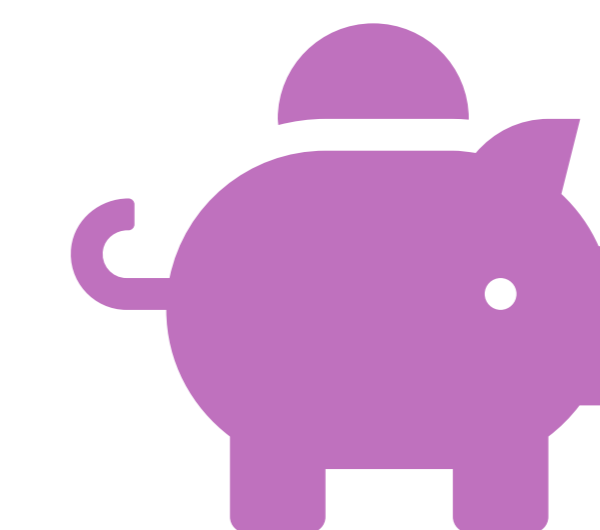

Why choose our energy services?

Lock in low rates

Avoid price hikes

No default tariffs

17+

Compare 17+ suppliers

Tailored, long-term energy strategies

1-2-1 account management

Reduce carbon footprint

Free business energy health check

We offer a free, no obligation audit to uncover hidden costs and efficiency gaps, with recommendations from our experts.

Cybersecurity

End-to-end protection for your business.

Firewalls, antivirus, endpoint security, email protection, and compliance – secure your business information with a tailored, fully managed service.

Network & infrastructure protection

Advanced firewalls and intrusion prevention systems shield your network from external threats, whilst endpoint protection secures every device across your business environment.

Email & access security

Email filtering and anti-phishing tools expertly block malicious communications, and Multi-Factor Authentication (MFA) offers passwordless, zero-trust options for secure user access.

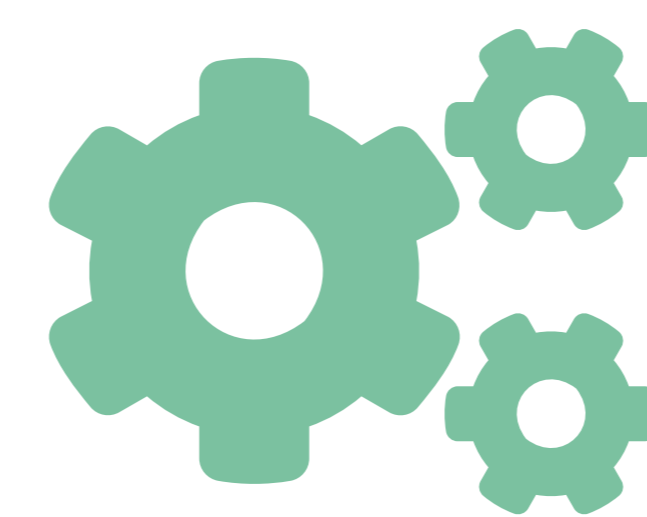

Human risk & compliance

Keep your team cybersecurity-aware with training and simulated phishing attacks, upskilling your employees and protecting your business. We'll also support you with compliance standards like GDPR and Cyber Essentials.

Backup & business continuity

With automated data backups and fast disaster recovery, your business information is protected at every turn. Our tools provide ongoing monitoring for rapid threat response and minimal downtime.

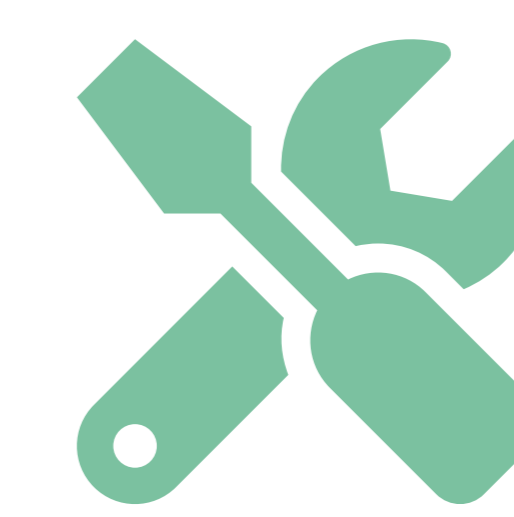

Why choose cybersecurity with CloudFusion?

Fully managed service

Scalable solutions

Industry-leading tools

Hands-on support

Proactive threat management

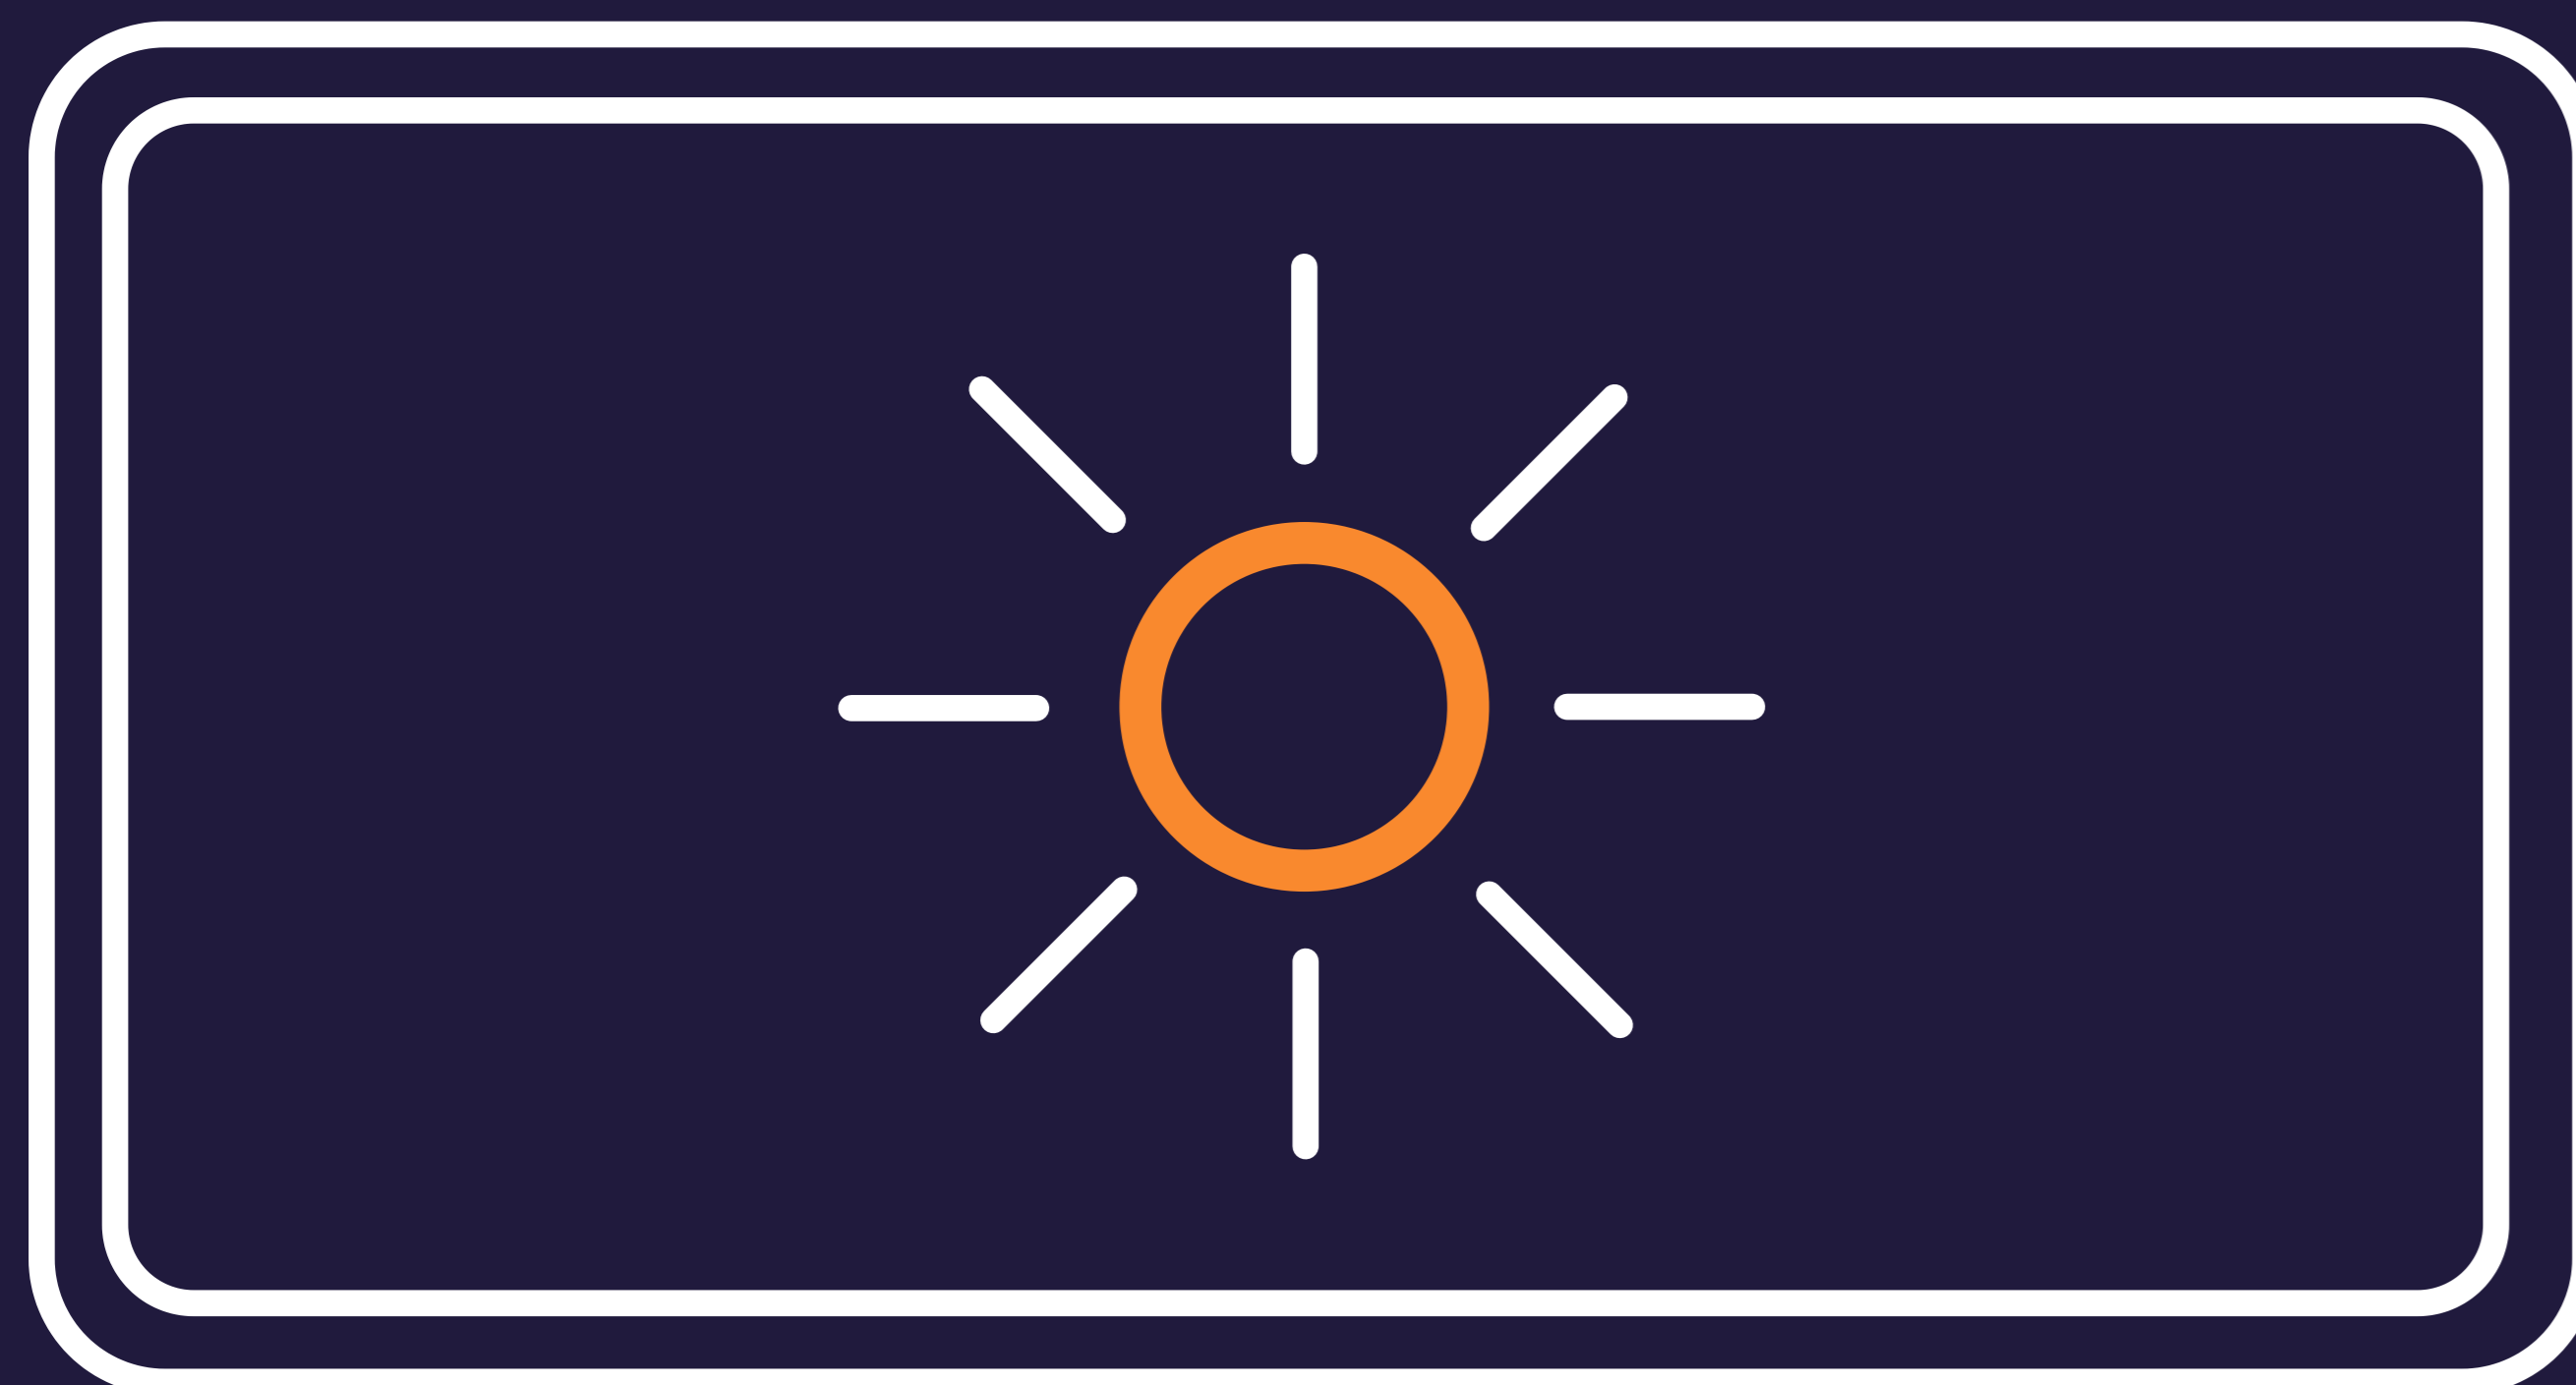

Tailored cybersecurity

Affordable protection

Digital Signage

Dynamic content for high engagement.

Want to create and display engaging content for customer messaging, promotions, or internal comms?

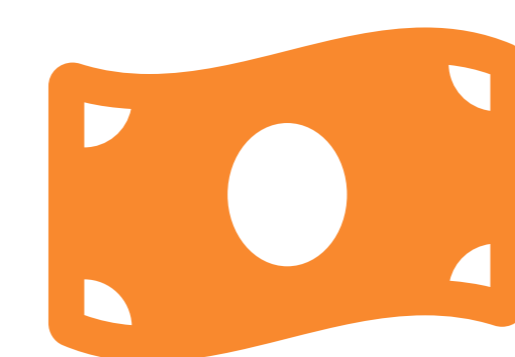

Our range of high-performance digital signage displays are installed and managed by our expert team. From in-store shelf-edge screens and ultra-bright window displays to outdoor LED totems and video walls, you'll be boosting sales and increasing customer engagement in no time.

We make sure your signage operates on a secure, stable network, so you can easily schedule, update, and control content across one or multiple locations instantly, all backed by infrastructure that's built for speed and reliability.
